MICROSOFT INNOVATION CENTRE

Microsoft Innovation Centre provide customers and partners comprehensive set of programs and services. The goal of the Microsoft Innovation Centre is to foster innovation and growth of Local Software economy (LSE). In long term, Microsoft has a mission to create a foundation of "a scalable supply-demand local software economy" by enhancing the ISV/SI competence and reach an IT job creation, augmentation of software innovation, interaction with industry.

In MIC, Developer and Platform Group of Microsoft collaboratively focusing on student developer employability, researching, and developing of innovative software solutions with an ecosystem made up of industry, academic, and government partners.

The MIC's offers students, ISV developers, architects, IT professionals, and researchers an access to research facilities, consultants, and resources. In many cases, Microsoft and government, universities, and industry organizations jointly operate these facilities.

Current Microsoft Innovation Center program offerings are grouped into the following three areas that are keys to the growth of software economies : Skills Accelerator, Industry Partnerships, and Innovation.

- Skills Accelerator: software development courses for students and professional ISV developers, employment programs for students.
- Industry Partnership: industry clusters, software quality certification, student research.
- Product Innovation: foster local product innovation through imagine cup competition, ISV coaching, hands-on experiences and the use of custom software development courses.
