

SESHADRI RAO GUDLAVALLERU ENGINEERING COLLEGE

(An Autonomous Institute with Permanent Affiliation to JNTUK, Kakinada)

Seshadri Rao Knowledge Village, GUDLAVALLERU-521 356, Krishna District, A.P., India

(Approved by AICTE, New Delhi and Permitted by A.P. State Government)

Accredited by NAAC

Phone Nos. 08674-273737, 273888, Mobile: +91 9848779121 Fax No. 08674-273957

E-mail: principal@gecgudlavalleru.ac.in, office@gecgudlavalleru.ac.in, Web: www.gecgudlavalleru.ac.in

E-content Development Facilities

As the nation experiences a demographic boom, globalization sweeps the globe, and society embraces new methods of growth and evolution, it is adapting newer techniques to develop and evolve. E-learning is becoming more popular among students nowadays instead of classroom instruction. The internet is accessible to students via any electronic device today. Compared to the traditional way of learning, access to E content is very convenient and more practical. In addition to the traditional print and radio media, e-content is all content created and delivered through electronic media with a combination of sounds, images, and text.

The state-of-the-art media centre at Seshadri Rao Gudlavalleru Engineering College includes built-in audio-visual capabilities. The Media Center has the tools necessary to create e-content and is set up to promote group learning and engagement.

Description of the facilities available in Media Center:

S.No	Name of the facility	Description
1	DSLR Camera	To capture the video lecture.
2	Wondershare Filmora	This video editor enables to edit video and audio.
3	Computer System	To edit the lecture content.
4	LCD TV	To give live telecast of the lecture being conducted.
5	Fiber Optical Cable	This is used to transmit high-definition audio and video signals which have greater bandwidth and speed.
6	HDMI optical converter	This set of equipment includes a sender and a receiver, which can transmit HDMI and separate signals to a remote location over a fiber cable which helps to see the real-time picture image remotely.
7	Networking Wall Rack	To ensure secured connectivity of HDMI optical converters and HDMI splitters.
8	Patch Cord	A patch cable is used to connect one electronic or optical device to another for signal routing. Devices of different types (e.g., a switch connected to a computer, or a switch to a router) are connected with patch cords.

9	HDMI Splitter	This splits the signal from the source device to facilitate simultaneous connection to multiple displays.
10	HDMI MALE CORD	Used to send HD signals over a single cable. This is used for transmitting both audio and video
11	Joint Box	This box protects the connections, which usually contain vulnerable points such as wire splices, from environmental conditions and accidental contact
12	Amplifier	This electronic device is used to reproduce the audio signal
13	Out door Horn speakers	Provide sound coverage to large areas. These outdoor speakers help the listeners to hear direct sound from the speaker.
14	Micro Phones	For recording clear audio of the lecture
