**Report**

9<sup>th</sup> September 2018

As a part of IE student chapter event organisation , Gudlavalleru Engineering College, a guest lecture named “Indian Remote Sensing Satellites, data reception and processing”, has been organized for 2<sup>nd</sup> and 3<sup>rd</sup> B.Tech students on <sup>9<sup>th</sup> September</sup> 2018 .

In this guest lecture the students were told about what type of communication is being used in the satellites in today’s generation.

Here they are informed about the various satellites used by India to monitor the data that will be useful for farmers as well as for weather forecasting. It is explained how a data is sent from an earth station to a satellite and how a satellite retrieves it and vice versa.

The various modes of access is explained for data processing which includes on board processing, baseband processing etc.,

The lecture gave students a brief idea about how the data we are using for train updates and so on are directly monitored and sent to us using a satellite.
