PROGRAM REPORT

Name of the Program: Guest lecture on “Experiences of building IT-Based Systems to Deliver Actionable Agricultural Information to Indian Formers”

Date: 7th March 2020

Details of the Resource Person: P. Krishna Reddy Professor, IIIT Hyderabad , Telangana

Objective of the Program:

- IT smart agriculture products are designed to help monitor crop fields using sensors and by automating irrigation systems.
- Farmers and associated brands can easily monitor the field conditions from anywhere without any hassle.

Outcomes of the Program:

- Students can provides innovative solutions for automation, efficiency, and precision in farming
- Student can management concept focused on providing the agricultural industry with the infrastructure to leverage advanced technology – including big data, the cloud and the internet of things (IoT)

No. of Participants:180

Concluding Remarks:

Smart farming techniques enable farmers better to monitor the needs of individual animals and adjust their nutrition accordingly, thereby preventing disease and enhancing herd health.
