Seshadri Rao Knowledge Village, Gudlavalleru – 521356, Krishna District (A.P.)

Introduction:

The Blue Prism Foundation course will introduce RPA concepts utilising the Blue Prism Robotic environment. Blue Prism is a set of tools, libraries, and run-time environments for RPA. Blue Prism has built-in support for connecting business objects to various kinds of application user interfaces, including browser-based HTML interfaces, Windows interfaces, mainframe applications accessed via terminals, and interfaces built using Java. At the end of the course, you will be able to develop in Blue Prism software and certify as a Blue Prism Developer.

Course description:

- This is a classroom course aimed for people interested in Blue Prism developing.
- It will cover the various aspects of blue prism such as processes, objects, work queues, etc.
- Different exercises practiced during the course will cover the various lessons and skills developed throughout the course.

Course objectives:

- To build an understanding of Blue Prism roles and responsibilities (Process Analyst, Process Developer, Process Controller, etc.)
- To introduce process assessment methodology and selection of suitable RPA process candidates
- To develop knowledge of the delivery lifecycle (Define, Design, Build, Test, Deploy)
- To develop and configure processes independently using Blue Prism software & methodology
- To use practical case studies / examples to practice newly acquired skills

Course outcomes:

Upon successful completion of the course, the students will be able to

- CO1 Able to create and maintain automated business/marketing tasks.
- CO2 Able to track the customer behavior.
- CO3 Able to work in Finance, Banking, BPO, Retails, etc.
- CO4 Learn Robotic process.

Program Outcomes (POS)

Engineering Graduates will be able to:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOS)

Students will be able to

PSO 1. Design, develop, test and maintain reliable software systems and intelligent systems.

PSO 2. Design and develop web sites, web apps and mobile apps.
