NDG Linux Essentials Course Overview

The Linux Essentials course, developed and supported by Networking Academy partner NDG, teaches students the fundamentals of the Linux operating system and command line, and basic open source concepts.

By the end of this course, students will be able to:

- Understand how Linux is used and the basics of the command line.
- Apply skills using Linux virtual machine with step-by-step and hands-on lab activities.
- Build foundational knowledge for progressively mastering Linux commands.
- Connect with the global Cisco Networking Academy community.

Students utilize a web browser to access the Linux Essentials content modules, lab exercises and virtual machines via Cisco NetAcad.com. Each learner has hands-on access to a Linux virtual machine to practice, explore, and test Linux command-line concepts. The 18-chapter, 70-hour course can be offered as instructor-led or students can enroll on their own.

Mapping of CO's with PO's and PSO's

Course Outcome:

By the end of the course,

CO1: Understand how Linux is used and the basics of the command line.

CO2: Apply skills using Linux virtual machine with step-by-step and hands-on lab activities.

CO3: Build foundational knowledge for progressively mastering Linux commands.

CO4: Connect with the global Cisco Networking Academy community.

Program Outcomes:

Engineering Graduates will be able to:

- a. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- b. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- c. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- d. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- e. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- f. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- g. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- h. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- i. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- j. **Communication:** Communicate effectively on complex engineering activities with the engineering community and wit society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- k. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- l. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes:

NDG Linux Essential Schedule of the Course

NDG Linux Essentials is an introduction to Linux as an operating system, basic open source concepts and the basics of the Linux command line. Content developed by experts, a Linux virtual machine and step-by-step labs give you hands-on access to practice Linux command line concepts. With no previous knowledge required, this course is the perfect starting point to gain Linux skills.

This course bridges the gap between beginner and intermediate skills by offering students hands-on, step-by-step practical lab activities. Graduates walk away with a firm grasp of the foundational concepts needed to succeed in a Linux career.

- This course prepares students for the LPI Linux Essentials Professional Development Certificate
- 100% online, self-paced and free
- No previous experience required
- Certificate of completion awarded at end of course

Student will learn these core skills

- Acquire open source concepts and progressively master Linux commands.
- Understand how Linux is used and the basics of its command line.
- Expand upon your basic knowledge of Linux
- Perform hands-on lab activities using a Linux virtual machine (provided free)

Dear Abhilash Babu Chennamsetty,

Congratulations on successfully completing the NDG Linux Essentials course in the Cisco Networking Academy. By completing this course, you are now prepared to earn the Linux Essentials Professional Development Certificate from the Linux Professional Institute (LPI).

Today's job market is competitive, but the rewards are worth it. With employers reporting they are paying salaries well above company norms, paying out bigger bonuses, and offering flexible schedules, there has never been a better time to have strong Linux abilities. Verifying your skills with a professional certificate can be a great way to stand out from other candidates, by proving you have the technical abilities required for the job. Become a stronger prospect in the job market by pairing our certificate with other industry-recognized certifications such as Cisco Certified Network Associate (CCNA).

OBTAINING THE LINUX ESSENTIALS PROFESSIONAL DEVELOPMENT CERTIFICATE SHOWS THAT YOU:

- Understand the Linux operating system
- Have demonstrated the ability to navigate a Linux system
- Can execute the power of the Linux command line
- Possess knowledge of Linux security and file permissions
- Have the motivation to advance your IT career

Go to LPI.org to learn more about the LPIC-1 Certificate! Again, congratulations and we wish you continued success!

*Sincerely,
The NDG Team*
